IMPERIAL ARMOUR VOLUME ONE - IMPERIAL GUARD & IMPERIAL NAVY

This 288 page hardback book provides detailed information on the war engines and weapons of the 41st millennium. From Leman Russ battle tanks, Chimera armoured carriers and Basilisk self-propelled artillery, to Tarantula sentry guns, Thunderbolt fighter aircraft and super-heavy tanks like the Baneblade and Shadowsword, this book describes them all in superb detail.

Heavily illustrated with over 120 colour and black and white pictures, 200 full colour vehicle profiles, over 120 technical drawings, plus organisation charts, combat formations, battle reports and tactics, to add depth and character to the Warhammer 40,000 universe.

In addition to all this, there is a new army list for Imperial Guard Armoured Battle Groups, background and rules for variable ammunition types and rules for four of the Imperial Guards most famous tank aces. Appendices contain all the rules you will need to use super-heavy vehicles and aircraft in your games, as well a detailing such matters as Imperial camouflage schemes, unit numbering and a general description of how vehicles are designed and built in the 41st millennium.
